

## Local Run Manager v4 への TruSeq DNA CD Index Kit の追加手順

### <事前準備>

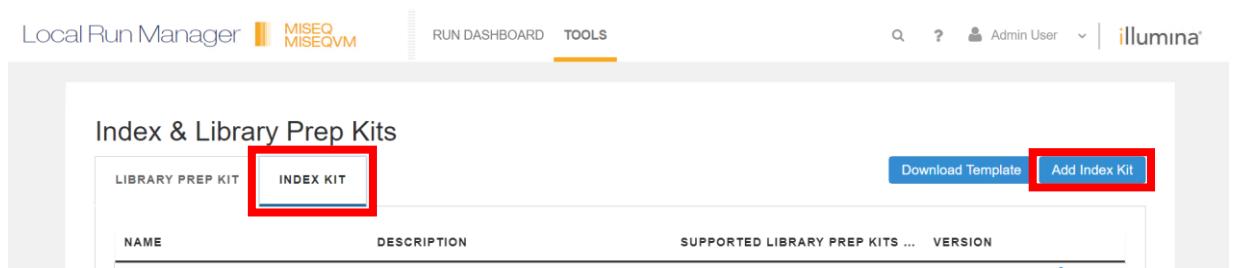

Local Run Manager (LRM) に追加する TruSeq DNA CD Indexes - 96 Indexes Kit の Template ファイル (.tsv 形式) を、装置内 (デスクトップ等) にご準備ください。Zip 圧縮ファイル (.zip 形式) の場合には、解凍 (Extract all 等) をお願いします。

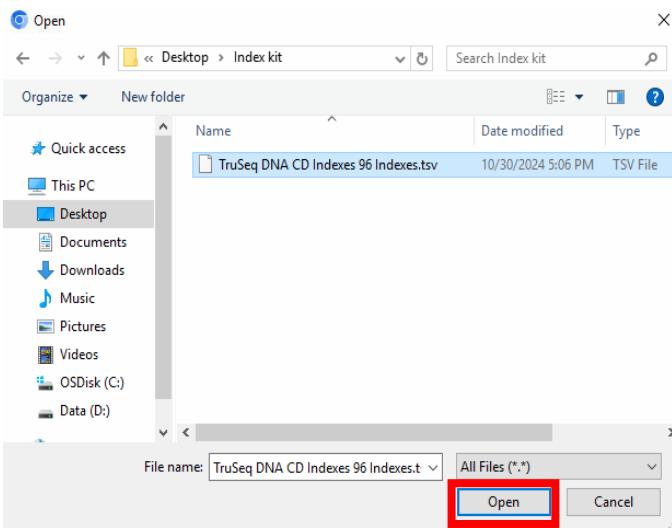

### <手順>

1. Windows デスクトップの LRM ショートカットをダブルクリックして開きます。
2. 「TOOLS」より「Index & Library Prep Kits」を選択します。

3. INDEX KIT タブを選択後、「Add Index Kit」ボタンから、Template ファイル (TruSeq DNA CD Indexes 96 Indexes.tsv) を選択し、Open をクリックします。

4. INDEX KIT タブを選択して、追加した Kit (TruSeq DNA CD Indexes 96 Indexes) が反映されていることをご確認ください。

The screenshot shows the 'Local Run Manager' interface with the 'RUN DASHBOARD' tab selected. In the top navigation bar, there are icons for ISEQ and ISEQ100, a search bar, and user information ('Admin User'). Below the navigation, the title 'Index & Library Prep Kits' is displayed. Underneath, there are two tabs: 'LIBRARY PREP KIT' and 'INDEX KIT' (which is highlighted with a red box). To the right of these tabs are 'Download Template' and 'Add Index Kit' buttons. The main content area is a table with columns: NAME, DESCRIPTION, SUPPORTED LIBRARY PREP KITS, and VERSION. The table lists various TruSeq index kits, including 'TruSeq DNA CD Indexes 96 Indexes' (which is also highlighted with a red box). At the bottom of the table, there are navigation arrows and the text 'Showing 61-70 of 83 item(s)'.
