Correlation Engine Customer Release Notes

Version 2.5.2

April 8, 2025

Introduction

These Release Notes detail the latest release of Correlation Engine, including known issues.

Correlation Engine provides an interface with tools and content for exploratory, preclinical, and early translational research in drug discovery and biotechnology research. The software is a multidimensional integration platform designed to search and correlate global collections of heterogeneous, large-scale experimental data across diverse platforms, organisms, and therapeutic areas.

NEW FEATURES:

- None

FIXED ISSUES:

- Fixed an issue where RNA-Seq study count was not showing for domains without domain libraries
- Fixed an issue where the public QuickView page was under heavy crawl load
- Fixed copyright year to 2025 on all web pages

KNOWN ISSUES:

- None
