Correlation Engine Customer Release Notes

Version 2.6.0

June 18, 2025

Introduction

These Release Notes detail the latest release of Correlation Engine, including known issues.

Correlation Engine provides an interface with tools and content for exploratory, preclinical, and early translational research in drug discovery and biotechnology research. The software is a multidimensional integration platform designed to search and correlate global collections of heterogeneous, large-scale experimental data across diverse platforms, organisms, and therapeutic areas.

NEW FEATURES:

- Scatter plot visualization of bioset vs. bioset comparisons
- Import now accepts feature identifiers, such as full Ensembl IDs, that have version numbers appended
- Protein datatype added to the import API

FIXED ISSUES:

- Fixed an issue where no studies were showing under the "Studies for" tab in Pathway Enrichment and data could not be exported
- Fixed an issue where filters on Meta-analysis/Bioset Results tab are not applied to export
- Updated privacy link in the footer

KNOWN ISSUES:

- None

DATA CONTENT UPDATE:

	Added since last release	Total public content
Studies	1,108	26,731
Biosets	9,458	196,387
